Addendum A: Re-do Parameters

- Not all assignments are eligible for re-dos; the teacher designates which assignments are eligible based on the content standards of the course
- The re-do may be an alternate assignment on the portions(s) that were not mastered in the original assessment or a component of the original assignment
- Students will be provided a minimum of one and maximum of two re-dos prior to the printing of interim reports and a minimum of one and maximum of two additional re-dos after the printing of interim reports and before the closing of grades for the marking period
- The higher grade prevails on re-dos
- Students must have completed all related work in order to complete a re-do assignment
- If a student demonstrates mastery of material later in the marking period, a teacher may choose to change earlier non-mastery score to “E” for exempt, which does not impact a student’s grade in the LMS
