

Western Tech Academy of Health Professions Program

The Academy of Health Professions (AHP) Program is a Career and Technical Education (CTE) Program that follows the National Consortium for Health Science Education curriculum. This program prepares students for entry-level healthcare employment and college healthcare programs.

Program Content:

- Medical terminology and abbreviations
- Technical communication skills
- Anatomy and physiology
- Vital signs
- Activities of daily living

- First Aid, CPR, and AED Training
- Medical mathematics
- Safe medical equipment usage
- Diversity awareness
- Disease progression
- Injury prevention
- Treatment modalities

Internships:

During their junior year, students participate in simulated lab settings and work with real patients during their internship at the University of Maryland Medical Center, the R Adams Cowley Shock Trauma Center, and the Baltimore Veterans Affairs Hospital to gain hands-on training in inpatient, outpatient, clinic, and office settings.

Articulation with CCBC:

All students in the Western Tech Academy of Health Professions Program are offered the opportunity to qualify for up to fifteen (15) articulated credits at the Community College of Baltimore County. Students are encouraged to participate in a variety of senior year options, including internships, dual/parallel enrollment courses at CCBC, advanced placement courses, an independent study Certified Clinical Medical Assistant (CCMA) program, and/or additional science and/or math classes. Students who take advantage of these senior options will be better prepared for healthcare careers and post-secondary healthcare programs.
